THE INTRODUCTION.

The Duty of Subjects.

CONCERNING the Duty of Subjects for Method's Sake, I shall rank into these Five Heads.

I. Reverence. II. Obedience. III. Piety. IV. Faithfulness. And Fifthly, Thankfulness.

The *First* is Reverence, which is a Godly Subjection, in Heart, Word and Deed; thinking and judging Honourably of the Magistrate, even of the Lowest; looking not to his Person, whether good or bad, but to the Person which he representeth, which is God; speaking Reverently, for it is written, *Thou shalt not rail upon the Judges, neither speak Evil of the Ruler of the People*, Exod. xxii. 28. Acts xxiii. 5. And using all lowly Gestures, whereof we have a notable Instance in *I Kings* i. 23, of the Prophet *Nathan*, who when he was come into the King's Presence, made Obeysance before him, he bowed himself with his Face to the Ground; yea, it is requisite that Subjects interpret the Sayings and Doings of the chief Magistrates to the best, and to conceal and cover their Faults, giving Fear to whom Fear, and Honour to whom Honour belongeth.

The *Second Duty* is Obedience; which ought to be performed by all Persons, and in all Things possible (the Contrary whereof God commandeth not) though hard and unequal, not examining what it is which is commanded, but being content with this, that it is commanded. *I advise thee*, (saith the Preacher) *to take heed to the Mouth of the King, and to the Word of the Oath of God. Haste not to go forth of his Sight, stand not in an Evil Thing; for he will do whatsoever pleaseth him. Where the Word of a King is, there is Power, and who shall say unto him, what dost thou?* Eccl. viii. 2, 3, 4, and this Obedience must be to all Governments, to the King as Supream, and to the rest appointed by him, *I Pet.* ii. 13, 14. And to these, whether Christian or Heathen, Good or Bad, Merciful or Cruel, for there is no Power but of God, *Romans* xiii. 1.

The

The INTRODUCTION.

The *Third Duty* is Piety, that Subjects pray for their Governors : Yea, tho' they were Infidels or Wicked. *I exhort therefore, that first of all Supplications, Prayers, Intercessions, and giving of Thanks be made for all Men : For Kings, and all that are in Authority, that we may lead a quiet and peaceable Life, in all Godliness and Honesty, for this is good and acceptable in the Sight of God our Saviour.*

I. Tim. ii. 1, 2, 3, Thus did *Danie'*, thus did the Ancient Christians for the Heathen Emperors, for their long Life and Safety, for their Issue and Off-spring, for their quiet Government, that their Councils might be Wise and Faithful, their Armies Victorious, their People Loyal, &c.

The *Fourth Duty* is Faithfulness, which requireth that Subjects be quiet and peaceable, and true Hearted in all Loyal Allegiance : That they be not treacherous or seditious, raising or consenting to Tumults, Insurrections, Mutinies, &c. but that they reveal such Things speedily, and that what they can by all good, possible, and lawful Means, they do defend and keep safe, the Health, Life, Person, Cause, Crown, Dignity, and Family of the supreme Magistrate, (King *G E O R G E* the Second) against all Opposers whatsoever, yea, with the Loss of their own Blood, for if we must lay down our Lives for our Brethren, much more for our Fathers.

The *Fifth Duty* of Thankfulness, which is a ready and chearful Love, which is to be shewed in a willing paying of Tribute, and bearing such Charges as are imposed by the King, or superior Magistrate, in as much as the Treasure of the King is the Sinew of the Common-Wealth, and because he watcheth and careth for all : So *Joseph and Mary travel willingly to be taxed*, Luke ii, 4, 5, *Our Saviour Christ and Peter pay Tribute*. Matth. xvii, 27. None are exempted, for if any, *Christ and Peter*, then why not their Successors ? And all these Things Subjects are to do chearfully and willingly, even to wicked Princes, not only for Fear, but for Conscience towards God, who accounts himself neglected, resisted, and opposed, when his Deputies are resisted, opposed or neglected.

The Protestant Remembrancer continued.

The Lord of Hosts who Rules all mortal Things,
Within whose Hands are plac'd the Hearts of Kings,
By whom all Kingdoms stand, and Princes reign,
Preserve thy *George* and my dread Sovereign.
Let Traitors Plots, like wand'ring Atoms fly,
And on their Heads pay tenfold Usury ;
His Bosom tutor, and his Safety tender,
O be thou his, as he's thy Faith's Defender ;
Great *Juda's* Lyon, and the Flow'r of *Jess*,
Preserve thy Lyons, and thy Flow'rs blest.

The Protestant Remembrancer continu'd.

EVERY Honest Man will entertain such Religious Principles, as are consistent with that Allegiance due to his Natural Prince and Liege Lord, and therefore of all he must never chuse the *Romish*. A Loyal Subject cannot embrace such rotten Principles as these ; that Popes have Power to Excommunicate Kings, and give away their Crowns to them who will do their Drudgeries. That they may absolve Subjects from all Oaths and all other Bonds of Obedience, and send out their Assassins to murder them, if they please not their sullen, hare-brain'd Humours. The infallible *Gregory* Seven, has decreed it hard and fast, that since the Church of *Rome* is grown so numerous, unless a King will make Satisfaction, they may openly profess to chuse another. But beware, and say you had fair Warning : If *Gregory* of *Rome* set you on Work, *Gregory* of *L O N D O N*, shall pay you your Wages.

Keep

The Protestant Remembrancer continu'd.

Keep some Friendship for him, whom you own for your Redeemer; and then own such Principals, if you can tell how, which pour out Contempt upon the Blood, Merits, Satisfaction, Intercession, Word and Sacraments, of him that died for you. The Papists talk at such a Rate as if they were loath to be too much beholden to Christ, they thank him civilly for his Kindness, but will not give him the needless Trouble of Dying, they will make Use of his Courtesy some other Way. *BELLARMINÉ* was very modest, when he said, that because God would Honour his Children, he would have them to get Heaven by their own Merits, which is more Honourable than to receive it as God's Gift: To be saved by the Mercy of the Father, thro' the Merits of the Son, is such a precarious beggarly Business, as is much below the Generosity of a Catholic Spirit: *Tapparus* was a Gentleman of much Gallantry; far be it from them (saith he) that the Righteous should expect eternal Life, as a Beggar expecteth an Alms, it is much more Glorious they should receive it as Conquerors, and possess it as a Reward due to their Labours; nobly resolved however! The good Works of Catholicks are so Heroical, and Superrogating, that they cannot chuse but challenge as great a Matter as that small Thing, called eternal Life, for (as he goes on with great Gallantry) our good Works deserves the Reward from God, as from a just Judge, and are able to abide his severe Judgment, though he should weigh all Circumstances; this it is to be a well-bred Romanist. But of all, and of all, commend me honest *Vasquez*. Eternal Life (saith he) is due to the Works of good Men, without any Covenant, or the Favour of God; and the Merits or Person of Christ adds no Dignity to the Works of holy Men? How can you forbear doting upon such a Religion, as will carry you to Heaven with Colours flying, Trumpets sounding, Drums beating, Matches lighted, and Bullets in your Mouth. But make an Act however, and read one Scripture, *If thou Lord shouldest mark Iniquities, O Lord who should stand?* Psalm cxxx, 3.

A Table of the Terms and their Returns for this present Year 1738.

Hilary-Term begins Jan. 23, ends Feb. 13.

Returns, or Essoign Days.	Exc	Ret.	Ap.	W. D
In eight days of St <i>Hilary</i> , Jan. 20	21	21	23	<i>Mond.</i>
From the day of St <i>Hilary</i> in 15 days, 27	28	28	30	<i>Mond.</i>
On the morr. of Purif. of bleff. <i>Ma. Feb.</i> 3	4	4	6	<i>Mond.</i>
In 8 days of the Purif. of the bleff. <i>Ma.</i> 9	10	11	13	<i>Mond.</i>

Easter Term begins April 19, ends May 15.

From the day of <i>Easter</i> in 15 days, <i>Ap.</i> 17	18	18	19	<i>Wedn.</i>
From the day of <i>Easter</i> in 3 weeks, 24	25	25	26	<i>Wedn.</i>
From the day of <i>Eas.</i> in one month, <i>May</i> 1	2	2	3	<i>Wedn.</i>
From the day of <i>Easter</i> in 5 weeks 8	9	9	10	<i>Wedn.</i>
On the morr. of the <i>Ascen.</i> of the Lord, 12	13	13	15	<i>Mond.</i>

Trinity Term begins June 2, ends June 21.

On the morr. of the holy <i>Trinity</i> , <i>May</i> 29	30	31	<i>Jun</i> 2	<i>Friday</i>
In 8 days of the holy <i>Trinity</i> , <i>June</i> 5	6	6	7	<i>Wedn.</i>
From the day of the holy <i>Trin.</i> in 15 days, 12	13	13	14	<i>Wedn.</i>
From the day of holy <i>Trin.</i> in 3 weeks, 19	20	20	21	<i>Wedn.</i>

Michaelmas Term begins October 23, ends Nov. 28.

From the day of St <i>Mic.</i> in 3 weeks, <i>Oct.</i> 20	21	21	23	<i>Mond.</i>
From the day of St <i>Mich.</i> in 1 month. 27	28	28	30	<i>Mond.</i>
On the morr. of <i>All-Souls</i> , <i>November</i> 3	4	4	6	<i>Mond.</i>
On the morrow of St <i>Martin</i> , 13	14	14	15	<i>Wedn.</i>
In eight days of St <i>Martin</i> , 18	20	20	21	<i>Tuesd.</i>
From the day of St <i>Martin</i> in 15 days 25	27	27	28	<i>Tuesd.</i>

N. B. No Sittings at *Westminster-Hall* on *Ascension-day*, *Midsummer-day*, the 1st and 2d of *November*, and the 2d of *February*.

The *Exchequer* opens eight Days before any Term, except *Trinity*, before which it opens but four Days,

Note. The first and last Days of every Term are the first and last Days of Appearance.

January hath XXXI Days.

The Old Year's past, the New doth now begin,
 Put off the old Man, abandon deadly Sin :
 Such as determine in their Sins to dwell,
 There is no Hopes but they run Post to Hell.
 Be careful, now's the Time, good Reader pray,
 Put off not thy Repentance 'till another Day.

February hath XXVIII. Days.

A Virgin purify'd ! what had she done ?
 Conceived and brought forth a first Born Son,
 But doubtless such a Birth could not defile her,
 Nor hinder, but that Maid we still may stile her :
 Sure he that came to cleanse the World from Sin,
 Poluted not the Bed he first lay in.

February 1738.

New Moon 7 day, 46' past 5 afternoon. ☾ 9
 First quarter 15 day, 41' past 4 afternoon. ☾ 2
 Full moon 23 day, 12' past 7 morning. ☾ 13
 ☾ may be seen the 23 in the morning before ☉ rise,
 ☿ and ♄ adorn our Hemisphere in the evenings.

M. D.	M. D.	Lunar Aspects	Clocks too fast.	Rises and Sets	Monthly Observations.
12	1	☉ 5 * * ori	10 48	1 M 23	Near this Time some unruly Irruption, disturbs his Imperial Majesty's Subjects near the <i>Turkish</i> Garrisons. Now is ☿ entering ♊ the Ascendant of <i>England</i> ; from thence we may expect an happy Unity amongst ourselves, and perceive God's Mercies generally to smile upon the Actions of his Majesty, and grand Affairs of the Whole Nation, infinitely to the Satisfaction of all sober Persons. Much News arrives from several Parts of the World, relating somewhat of very weighty Importance.

The 22 Day of this Month 1722, was born the Princess *Mary*.
 Saturn squares the Sun from the very Place where ☿ in *January* last squared him; God preserve the City of *London* from Fire and other Disasters pointed at by *Saturn* in *Gemini*.

March hath XXXI Days.

Now by your Leave and with your Leek St *Taffey*,
What makes you frisk and caper so ? Why Laugh ye ?
O ho ! Hur Saints Day's come, go Milk your Goats,
Let Barley Cakes go down your hungry Throats.
Leeks ride in Triumph now, why should they not ?
As long as they can 'scape the Pottage Pot.

April hath XXX Days.

Fine pleasant Mornings court us now to rise,
 And view *Sol's* Glories in the Eastern Skies.
 But would you turn your Eyes another Way,
 And view the Son of Righteousness who lay,
 In Earth's dark Womb, and did from thence arise,
 A glorious *Sabbath-day* to solemnize.

June hath XXX Days.

Sly and Self-ended Chronos Sol doth court,
 Pretends true Love, intends to be paid for't;
 The warlike Star to fury doth incline,
 His mutinous Passion hinders some Design.
 And honest Jove with angry Rays Aspect,
 No Harm designs, but Evil to correct.

July hath XXXI Days.

If *Switthin* weep this Year, the Proverb says,
The Weather will be foul for forty Days:
But still Exceptions to such Rule, there are,
As in this Case (except some Days be fair.)
Husband-man ply thy Work, no time mispending ;
On Providence, not Proverbs, still depending.

August hath XXXI Days.

The churlish Dog that nigh the last Months close,
 Began to wind us, now more furious grows:
 He snarls, He shews his Teeth, he barks out-right,
 Yea, like a currish thing doth snap and bite;
 And this so oft, that one would think the Fleas
 Did these hot Nights disturb his dogish Ease.

October hath XXXI Days.

Luke a Phyſician, happy in his Trade,
Learn'd and belov'd, but far more happy made;
When the chief Doctor him a Licence gave,
As well as Bodies, Souls to cure and ſave.
What ſo great Honour can to Man be given,
Inferior unto that reſerv'd for Heaven.

November hath XXX Days.

Here I will tell you of a wicked Crew,
 Who to enlarge old Hell, would make one new;
 Where Darkness, Fire and Brimstone, Wood and Sin,
 Made up compleat the Devil's Magazin.
 Ah cursed Plot! that by an horrid Train,
 Would with one Blast have King and Kingdom slain.

December hath XXXI Days.

Now take ye heed, lest while we call them holy,
These Days may not be spent in Sin and Folly,
In cheating Games, in tipling and excess;
But to God's Praise, and our own Happiness.
Thus every Day i'the Year employ'd should be
By all that hope a good New-Year to see.

PARTRIDGE, 1738.

Astrological Observations on the Year 1738.

Of the Brumal or Winter Quarter.

WHich begins at such time as the Sun (apparently) enters the first Scruple of *Capricorn*, and falls this Year 1737, under the Meridian of *London*, (according to the Celebrated Tables of my Astronomical Friend Mr. *Charles Leadbetter*) December, 10^d, 5^h 13' 7" apparent Time P. M. at which Time and Place we have 17° of $\times$ culminating, and near 18° of $\odot$ ascending our *Eastern* Horizon; *Mars* and *Venus* conjoin'd in the Fifth; *Sun* and *Mercury* conjoin'd in the Sixth with the *Moon*; *Jupiter* in the Ninth; and *Saturn* in the twelfth Retrograde; the Head of the *Dragon* in the Third; and the *Tail* in the Ninth; *Part of Fortune* in the Ascendent, thus are the Heavens posited at the Time of this Melancholy Ingress. The Days are now shortest to all People inhabiting the North-side of the Equator, the Sun has the greatest Declination 23°, 29', and Amplitude 39° 50' South, but has now the least Meridian Altitude 14° 59', but at *Crofton* in *Lancashire*, the Sun's Height at Noon is only 13° 9', and Depression at Midnight the greatest, causing long and tedious Nights, which makes the Sick and Diseased to cry out with Holy *Job*, *wearysome Nights are appointed to me, when I lie down, I say, when will the Night be gone*, Job vii, 3, 4.

This Quarter is naturally cold and moist, of complexion, and temperature Flegmatick. Now the Air is more Cold in the Septentrional Countries, binding up the Earth with Frosts, and Cloathing it with Snow: The Pores of the Body are closed up, and heat draweth inward comforting the Vital Spirits, and causeth a greater Appetite to Meat and Drink than at other Times; all Bodies in the external Parts wax cold, which causeth the Heat which is within to flee back, gathering itself to internal Parts, and there have the Predominancy: And this is the Reason, why that Water which is in deep Wells, and that which immediately Issues out of the Earth, is hotter in Winter than in Summer.

Now let us return to our Figure and see what it affords, why, truly according to *Cardan* and *Bonatus*, the Position

PARTRIDGE, 1738.

fition of *Mercury*, *Sun* and *Moon* in the Sixth, causes great Unfaithfulness in Servants, many will rob their Masters, and sell either their Life or Liberty for a trifle: *Cauda Draconis* in the Ninth, endangers many Ships at Sea, and I am afraid we shall hear of the Loss of many a rich Ship, to the great impoverishment of many of our Merchants: *Saturn's* Presence in the 12th is of bad Import to great Cattle, as Horses, Oxen, &c. and that many (in London, for Π is on the Cusp thereof) will meet with many Sorrows, Tribulations, Imprisonments, and the like dire Calamities. But *Mars* and *Venus* in the 5th, disposed of by Ψ near the Cusp of the Tenth, Elevates the Minds of People in general, to Mirth and Jollitry. This being a Season more fit for Counsels than Actions, I shall conclude with the Poet.

*Above the Horizon the Sun scarce Peeps,
But presently in the Ocean he Steeps,
His fiery Steed: Thetis so long detains him,
Aurora jealous grows, e're that she leave him:
Thro' his long Absence, the wet Element
Congeales to Ice, the Clouds which Rain down sent,
Drops Flakes like Wool, so that unto our Sight,
Brooks, Woods, and Fields are all dy'd White;
Come gentle Spring, and let thy Pow'r be seen,
Expunge the White, and write it all in Green;
And Titan Mount, let not dim Phæbe shine,
Longer than thou, Lord of th' Ecliptic Line.*

The Spring-Quarter.

BEgins at such a Time as the Earth enters the first Scruple of *Libra*, or (apparently) when the Sun toucheth the first Point of the Equinoctical Sign *Aries*, and this Quarter continues while the Sun passeth thro' *Aries*, *Taurus* and *Gemini*; *Mars*, *Venus* and *Mercury* being chief Rulers thereof, which this Year 1738, falls on *Thursday*, according to the following Calculation,

PARTRIDGE, 1738.

	s.	°	'	"

Remains				0
Equation of Time Sub.			7	40
Apparent Time is Decemb.	9	7	7	20 49

The Face of Heaven at *London* at that Time is thus, viz. 15° of *Cancer* Culminates; 12 of *Libra* Ascends; *Saturn* in the 9th disposed of by *Mercury* in *Pisces*, in the Fifth, *Jupiter* conjoyn'd with *Moon*, in the Sixth in *Aries*, where we also find *Sun* and *Venus*, all Three being Combust; *Mars* in the Imum, *Cæli* in an airy Sign, this Position may signifie the besieging, or taking, or assaul-ting some City, Castle, or Fort, or sudden Entrance of an Enemy into some Haven or Sea Port, with Pyratical Intentions of seizing, or surprizing some Vessels or Ships in that Port or Harbour; many Controversies, hot Disputes, and those like to be Spiritual, Wrangling thereupon, se-veral unusual Sickneses, of which, especially Children, and young People die, and many Women in Child-bed, for no less than three Planets Combusts in the Sixth, de-notes the same; great Divisions, or many Disputes will be held about Religious Tenents, or Matters concerning true Worship, for the Planet *Mars*, as placed in an airy Sign, seemeth to import so much. Three Planets in *England* Ascendent, gives Cause for those People to Fear. *Multitu- dinem, pustularum & similia*, viz. That the Small-Pox will be more frequent than formerly, and also such other childish Infirmities, even of the same Nature, and those apparent, both in the City of *London*, and Parts Adjacent. Several Merchants shall Adventure their Stocks, upon
Hopes

PARTRIDGE, 1738.

Hopes of Advantage by long Voyages, but these are like to determine without Profit; nay, these will be chargeable, hazardous to Ships and Men, than any Ways gainful, either unto Owner, Merchant, or Seaman; for *Mercury*, Lord of the 9, disposed on by *Jupiter* Combust in the Sixth, and *Saturn* located in the Ninth, are Testimonies in Art too strong to be passed over with Silence. The Ascendent of *Russia* being on the Cusp of the Tenth, shews that Empire to be in a flourishing Condition, and to gain Ground of her Enemies.

Argento respondent Omnia.

*Apollo now rides equally between
The Worlds two Poles, and is as long Time seen
Within our Hemisphere, 'ere that he leave us,
As in the other half World, which is beneath us:
And mounting higher, doth again revive
Things Sensitive, as well as Vegetive:
Man chearfully Trips o're th' enamell'd Fields,
Which many sweet Delights unto him yields:
There grows all Flowers to the Eye or Scent,
The which (almost) might give the Soul content:
Sweet Harmony to please the dainty Ear,
Melodious Birds are chanting every where;
So shrill proceeds the Musick from their Throats,
Rocks ring the Ecchoes of their well tun'd Notes.*

The Summer-Quarter.

Fas est et ab hoste doceri.

THIS Quarter commenceth when the glorious Lamp of Heaven seemeth to touch the first Point of the Tropical Sign *Cancer*, making the longest Days and shortest Nights to all the Northern Inhabitants; at *Peck-hill* in *Lancashire* it is 16^h 46', and the Nights 7^h 14'; at *London* the longest Day is 16^h 26', and the Night 7^h 34'. The apparent Time of this Ingress falls this Year on *Saturday, June 10^d 6^h 19' 34"*, at which Time we have at *London* 7° of *Sagittarius* ascending, and 5° of *Libra* on the Cusp of the 10th; *Saturn* conjoin'd with *Sol* in the 7th, where *Mercury* is also Retrograde in Sextile to *Mars*

PARTRIDGE, 1738.

in the 4th, applying to a Conjunction of *Jupiter*; *Mars* is in Square to *Venus* in the 8th, and in Trine to the *Moon* in *Leo*, near the Cusp of the 9th House; and we also find $\oplus$ in the 2d *Caput Draconis* on the Cusp of the 9th, and *Cauda* on the Cusp of the 3d in *Aquarius*; *Mars* is in $\vee$, and therefore claims most Right there, because he is chief Lord thereof; $\oslash$ is also in the Day-house, viz. II, and there is a Reception of *Sun* and *Moon* by House, thus are the Heavens disposed at the Ingress of *Sol* into *Cancer*; and by this their Position, they do declare sundry and various Matters to happen in the World, especially in those Places under *Aries* and *Cancer*. Horrible Actings amongst Men, abundance of Cares, Sorrows, Fears, Contrarieties, Contradictions; Men will be wholly intent in getting and Purloining of other Mens Estates; every Man for himself (God for us all.) Men will with much Craft and Subtility, or without any just Pretence, or laudable Occasion, sweep away other Mens Estates: These Conclusions may probably take Place in several Parts of *Europe* where Armies are marching, &c.

The nearness of *Cauda Draconis* to the Cusp of the third, discovers much Grumbling and Repining by Reason of High-way-men being so troublesome to their Country. If *Muscovia* be under *Aquary*, as Authors affirm, then in human Probability that Country is like to have a great Share in prodigious and warlike Actions; many Negotiations pretended for Peace, by the *Turk* and *Tartar*, for *Saturn*, Lord of the third, in Conjunction with the *Sun* in the very Beginning of *Cancer* in the seventh, being the Ascendent of *Constantinople*, declares so much of Intricacy, both in treacherous Consults, and dissembling Actions, that it is not possible to divine, whether the martial Man, or the pretending Peace-maker is the greater Fox. This is a proper Time, or Season for Action where Armies are marching with an intent to give Battle to their Enemy: *Taurus*, the Ascendent of *Persia* being on the Cusp of the 5th and 6th Houses, and *Venus* Lady thereof in the 8th, in Square to $\oslash$, may probably give some Uneasiness to that new Emperor *Kouli Kan*, by means of some extravagant Plot, or detestable Design, either under

PARTRIDGE, 1738.

der a religious Pretence, or concerning some Breach of pretended Privileges, or Customs.

*What hideous Noise rings in the Firmament?
See with what Violence the Clouds are rent:
What Thing oppresseth Nature, thus I wonder,
That Heavens crack, as they would split asunder.
The Clouds dissolve in Tears to bear the Sound,
The Fire runs flashing all along the Ground.
The World's fixt Centure shakes, and Man doth Fear,
Lest all to nothing turn as first they were,
But see all's hush'd with mild Aspect the Sky,
Unmasks her cloudy Front immediately,
And Comforts us, that were but now half dead,
And thought the Grave would next have been our Bed.*

Of the Autumnal or Harvest-Quarter.

THIS Quarter begins when the Sun entereth the Equinoctial Sign *Libra*, which this Year 1738, fall at *London* on *Tuesday September 12*, at *41' 22"* past 7 a Clock in the Morning, making an Equality of Day and Night; the Sun has now neither Declination nor Amplitude, his Meridian Altitude being equal to the Complement of the Latitude, at *London* $38^{\circ} 28'$, at *Peck-Hill* in *Lancashire* $36^{\circ} 38'$: We have 23 ☿ culminating, and 17 ☿ ascending, *Mercury* in the first House in his Triplicity, *Venus* in the second in her Detriment, in Δ to *Saturn* in the 9th, in his Detriment, *Moon* and Part of *Fortune* in the 4, seperating from a Square of *Jupiter* Retrograde in the Western Angle in his Triplicity, *Saturn* and *Mars* in the 9, *Caput Draconis* in the 10, *Cauda* in the 4 with ☉, this is the Face of Heaven at the Time and Place above mentioned. *Libra* the ascendent of *Austria* upon the Cusp of the Ascendent, and ♀ *Lady* thereof in the 2d, in Δ to *H* in the 9th, denotes that Country to be in a flourishing Condition, and that their Clergy go on bravely, as it is written by that great Apostle *St. Paul*, 1 *Cor.* x. 7. *Neither be ye Idolaters, as were some of them; as it is written, The People sat down to eat and drink, and rose up to Play, Exod.* xxxii. 6. There are now in Agitation very grand Affairs of more

PART RIDGE, 1738.

Concern than any in this Summer, tumultuous Counsels, uncertain Resolutions, great Fights both by Land and Sea, several treacherous Designs on Foot, some most eminent City, Town or Castle besieged, concerning the relieving thereof, or taking it; there's in all human Probability, much Slaughter of Mankind, much Captivity, much Confusion, much Breach of Articles, Complaints, great Desolation of People; this, and these Accidents towards *Russia, Hungary, Turkey, Persia*, and their Confines, for *Moon*, Lady of the tenth, intercepted in the 4th in *Aquarius*, denotes as much. *Jupiter* in φ , Retrograde in the 7th, *England's* ascendent, shew that all the Spawn of the Jacobite Tribe are not quite exhausted, but there are still some who would disturb the Peace of our *Sion*, and will endeavour with all their might to prosecute that, or those Things that will most likely tend to their own Ruin, for *Jupiter* is the distributor of Justice, therefore in all likelihood they may possibly meet with such Reward as they did not expect. *Aut Cæsar, aut Nihil*. Avarice, Self-ends, Covetousness, &c. will so generally obstruct the Parties intrusted to compose Breaches, that here doth not appear as yet, any universal Peace; but that such Actions as *Mars* is of do follow, who now by his Motion through *Gemini* is very slow, for he quits not *London* Horoscope till *March* 18, 1739, making his Abode therein no less than 7 Months, a long Time in Earnest. I wish our Merchants do not hear of many Losses of their Shipping at Sea, either by Storms or Pyrates; the Pirate *Angria* is (at the Writing hereof,) very Potent in the Eastern Seas, Witness his taking the Ship *Derby* richly Laden, belonging to our *East-India* Merchants. And now gentle Reader, the Contemplation of the glorious Heavens, that vast Fabrick (the whole Work of the immense Creator) the visible Wonder of the whole Creation, is the Subject of our Speculation: Therefore, a while avert your Thoughts from these inferiour Things, and raise your Soul above the stary Orbs, and Contemplate on the Abode of the blessed, wherein thou shalt find such Comfort, that I doubt not but it will take thy Mind off from all sublunary Things, for *Salmon* tells us, *Proverbs* x. 7. *That the Memory of the just is blessed, but the name of the wicked shall rot;* and

Psalms

PARTRIDGE, 1738.

Psalm ii. 12. *Blessed are all they that put their Trust in him.* Which that we may all do, let all my Readers say, *Amen.*

*No subcelestial Things have Permanence,
All Things decay, compos'd of Elements.
How curiously of late, was Tellus Crest,
With various Colours by sweet Flora Dress'd.
As Roses, Lillies, Gilliflowers and Daisies,
With Honey-suckles, and with yellow Craises.
With Millions more, which I cannot repeat,
Such as by no means art can Counterfeit.
But all those Dresses wrought by Natures Hand,
Are now cut off, and may no longer stand;
The ample Fields are of their Green bereft,
On Trees no Fruit, nor Leaves at all are left:
Meadows are robb'd of what Delights them most,
* Narcissus Soul, and † Hyacinthus Ghost,
The Earth doth Grieve, because she must intomb,
The Seed she bare again within her Womb.*

Of the Eclipses that will happen in 1738.

Within the Perimeter of this Year, there will be only two Eclipses, and both of the Sun.

The first of these Solar Defects happens on *Tuesday February the 7th*, 5^h 52' 16" is the equal Time of the true Conjunction of the Sun and Moon; but the apparent Time is *February 7^d 5^h 37' 57"* of the Ecliptic Conjunction, the Sun sets that Night at *London*, at 5^h 0' 40", but the Time of the visible $\odot$ would not happen till 11' 21" past 7 at Night; these with some other Circumstances Corroborating, proves this Eclipse inconspicuous at *London*, but in the South West Parts of the World it will be very formidable: And for the sake of our Western Navigators, I will give a Synopsis of its Calculation for *Port-Royal* in *Jamaica*, whose Latitude is 17° 40' N.

* *Narcissus, a fair Boy, who being in Love with his own self, was turn'd into a Lillie.*

† *Hyacinthus, a Boy who Apollo loved, and by Misfortune flew.*

{ End of the Eclipse	2	49	16	
{ Total Duration	2	31	23	
{ Digits Eclipsed are South	3	42	3	

The other Eclipse falls on *Friday August 4*, (according to the Tables and Calculation of my much esteemed Friend Mr. Charles Leadbetter;) at *London* it will be visible (if Clouds hinder not) and almost one third Part of the *Sun's* Diameter on the South Side will be obscured from our Sight, as the following Account makes more plain :

	D.	H.	'	"
Hence the App. Time at Lon- don of the { Beginning is 1738, August	3	22	11	7
{ Visible ♂		23	8	11
{ Middle, or greatest Darkness		23	13	22
{ End of the Eclipse	4	0	16	17
{ Total Duration		2	5	10
{ Digits Eclipsed are South		3	37	24

At Time of the Middle of this Eclipse the *Sun* is Vir-
 tical to *Zanfara*, a City of *Nigritta* in *Africa*, Latitude
 14° 7' North, and Longitude East 11° 39' 30"; and we
 have then at *London* 9° of Ω culminating, and 29° of
 α ascending, γ near Retrograde in the 7th, in the very
 Beginning of δ ; δ in the 8th disposed of by ζ , and
 in Δ , to her in the 11th, η in the 9th, in $\ast$ to φ in
 the 10th, where we also find *Caput Draconis*, and the *Lu-*
minaries. Here the *Sun* suffers an Eclipse in his own House ;
 and *Cardan* tells us that it doth generally stir up Sedition,
 Tumults, Rebellions, &c. against Governours and Go-
 vernment, such as Wars, Slaughters, Commotions, Cap-
 tivities,

PARTRIDGE, 1738.

tivities, and such like Evils. The Places under the Eclipsed Sign are *Italy, Bohemia, and Part of the Ottoman Empire; Bristol, Prague, Demascus, Rome, &c.*

For the Satisfaction of my curious Reader, I shall here give the Calculation of the general Eclipse of the *Sun* at *London*, according to the Method of my Astronomical Friend Mr. *Charles Leadbetter*, taught in his *Uranoscopia*: a Book worthy of any One's perusal; that would understand these Things:

	D.	H.	'	"
Equal Time of the true Orbit $\oslash$ Aug.	3	23	48	1
Equation of Time Sub.			4	2
Apparent Time, true Orbit $\oslash$	3	23	43	59
Time of Reduction add				53
Apparent Time of Ecliptic $\oslash$	3	23	44	52
True hourly Motion of $\oslash$ á $\odot$			30	20
Semidiameter Earths Disk			57	5
Semidiameter of the Peumbra			31	25
<i>Sun's</i> Declination North	14		6	17
Angle of the <i>Moon's</i> Way	5		42	40
True Latitude of the <i>Moon</i> , N. A.			10	22
Sum of the Disk and Penumbra			88	30
Difference			25	40
Inclination of the Axis to the Right	18		58	0
First Angle of Incidence	83		16	0
Angle of Direction	13		15	20
Motion of half Duration			87	53
The Time Sub. and add	2		53	50
Second Angle of Incidence	79		32	0
Motion of half Central Eclipse			56	8
The Time Sub. and add	1		51	2
Third Angle of Incidence	66		11	0
Its Motion			23	29
The Time Sub. and add			46	27
Dist. of $\oslash$ in $\ominus$ Axis			10	39
Dist. of $\oslash$ in Axis Ecliptic			10	25
Motion between the two Axis			2	26
The Time Sub.			4	49
By the above Calculation I have found.				

Hence

Hence the Appar. Time

PARTRIDGE, 1738.

Hence the Appar. Time at London.	{	The Eclipse begins at ☉ Rising Aug. 3.	20	49	16
		The Sun Centrally Eclipsed at ☉ Rising	21	52	4
		The Eclipse end at ☉ Rising	22	56	39
		The Sun Centrally Eclipsed in the Meridi.	23	38	17
		Middle of the Central Eclipse	23	43	6
		Sun is Centrally Eclip. in Nonagesstime	23	44	52
		The Eclipse begins at Sun setting	4	0	29 33
		The ☉ Centrally Eclipsed at his setting	1	34	8
		The Eclipse ends at Sun setting	2	36	58
		Total Duration of the Central Escipse	3	42	4
		Total Duration of the General Eclipse	5	47	40

And the Places on the Globe where these Appearances happen, are as follows:

1. The Eclipse begins at *Sun* Rising in the Lat. $19^{\circ} 22'$ North and Longitude $47^{\circ} 24'$ West, which Place falls in the *Atlantic* Ocean.
2. The *Sun* is Centrally Eclipsed at his Rising in Lat. $22^{\circ} 57'$ N. and Long. $64^{\circ} 9'$ West.
3. The Eclipse ends at *Sun* Rising in the Latitude of $35^{\circ} 46'$, N. and Long. $84^{\circ} 36'$ West.
4. This Place falls near *Carolina*; the *Sun* is Centrally Eclipsed in the Meridian, in the Latitude of $24^{\circ} 52'$ N. and $5^{\circ} 26'$ to the East of *London*; this Place falls in *Barbary*.
5. The *Sun* is Centrally Eclipsed in the Nonagesstime Degree in the Latitude of 24° N. and Long. $7^{\circ} 30'$ Long. East; this Place also falls in *Barbary*.
6. The Eclipse begins at *Sun* set, in the Latitude of $10^{\circ} 14'$ N. and Long. $85^{\circ} 15'$ East; this Place falls in the *Indian* Sea, S. E. of *Fort St. George*.
7. The *Sun* will set Centrally Eclipsed in the Latitude of $2^{\circ} 42'$ South, and $65^{\circ} 47'$ East Longitude; this Place falls in the Ocean N. E. of *Madagascar*. The *Sun* sets as the Eclipse ends in the Lat. of $6^{\circ} 20'$ South, and $49^{\circ} 10'$ East Long. this Place falls in the Ocean North of *Madagascar*.
9. The *Sun's* Lower is just touched by the *Moon's* Upper Limb in the Meridian, in the Latitude of $61^{\circ} 34'$ North, and Longitude $5^{\circ} 26'$ East; this Place falls on the Globe not far from *Drontham* in *Norway*.
10. The *Sun's* Upper is just touched by the *Moon's* Lower Limb in the Meridian, in the Latitude of $9^{\circ} 51'$ North; this Place falls near the Southern Coast of *Guiney*. The Central Shade of the *Moon* enters on the Globe in *Carolina*, and bends

its

PARTRIDGE, 1738.

its Course W. S. W. over the *Atlantick* Ocean, with a Velocity of 35 Miles in a Minute, leaving *Bermudas* a little to the South, and *Madera* to the North, entering *Africa* near *Morocco*, passing over *Barbary*, the Southern Parts of *Egypt*, crossing the Red Sea; and *Turkey* in *Asia*, and so on over the *Arabian* Sea, to the Southern Parts of *India*, setting in the *Indian* Sea as the Eclipse begins, when it has travelled 11745 $\frac{1}{2}$ Miles, the Breadth of which Shadow is 3581 $\frac{1}{2}$ Miles.

Besides these Luminarian Eclipses, the *Moon* will make a near Appulse to the Planet *Mercury* three Times this Year, viz. *January* 11, a Quarter past 4 in the Morning; *August* 5, half an Hour past 2 in the Afternoon, and *December* 31, a Quarter past 2 in the Morning; all invisible at *London*.

The following Table is of excellent Use to all those that have *Telescopes*; for by it, they may distinguish the Satellites one from another, they are here inverted, as they will be seen through two Convex Glasses.

ADVER-

ADVERTISEMENTS.

DR. Partridge's Night Drops, Night Pills, *Matthew's* Pill, and his other Medicines of his own Preparing, continue to be sold as before by his Widow, at the *Blue Ball* in *Sallisbury-street* in the *Strand*.

ARTIFICIAL Teeth, set in so firm as to eat with them, and so exact, as not to be distinguished from Natural: They are not to be taken out at Night, as is by some falsely suggested, but may be worn Years together: Yet are they so fitted, that they may be taken out and put in, by the Person that wears them, at Pleasure; and are an Ornament to the Mouth, and greatly helpful to the Speech. Also, Teeth cleaned and drawn, by *John Watts* and *Samuel Rutter*, Operators, who apply themselves wholly to the said Business, and live in *Raquet-Court, Fleet-Street, London*.

STEEL Trusses for Ruptures, Bag-Trusses for fixed Tumours, Back Irons, and other Instruments for the Lame or Crooked: By *Peter Bartlett*, Steel Truss-Maker to the Chest at *Chatham*, for the Help of his Majesty's Seamen; at the *Golden Ball* in *St. Paul's Church-yard*, near *Cheapside, London*.

Persons in the Country, sending their Bigness, and which Side the Rupture is, may be supply'd with the Trusses, and proper Directions.

His Wife is Skilful in this Business to her own Sex.

Printed for T. LONGMAN, at the Ship in Pater-noster-Row.

ANew Practise of Physick; wherein the various Diseases incident to human Bodies are orderly described, their Causes assigned; their Diagnosticks and Prognosticks enumerated, and the Regimen proper in each delivered; with a competent Number of Medicines for every Stage and Symptoms thereof, prescribed after the Manner of the most eminent Physicians among the Moderns, and particularly those of *London*; the whole formed on the Model of *Dr. Sydenham*, and executing the Design of his *Processus Integri*, in Two Volumes, Octavo. By PETER SHAW, M. D.
